Working in Partnership

# Atlantic Meridional Transect (AMT)

"The Atlantic Meridional Transect (AMT) is a multidisciplinary programme which undertakes biological, chemical and physical oceanographic research during an annual voyage between the UK and destinations in the South Atlantic."

https://www.youtube.com/watch?v=qSjc TcCKMiE&feature=youtu.be

### **AMT**

"Quantify the nature and causes of ecological and biogeochemical variability in the planktonic ecosystems of the Atlantic Ocean"

"Assess the effects of this variability on biological carbon cycling and air—sea exchange of radiatively active gases and aerosols"

"Unique, spatially extensive, decadal data set continues to be made available to the wider community through the British Oceanographic Data Centre"

Robinson, C., Holligan, P. and Jickells, P. (2006). The Atlantic Meridional Transect Programme. Deep Sea Research Part II: Topical Studies in Oceanography Vol 53, Issues 14-16 pp. 1483-1484.

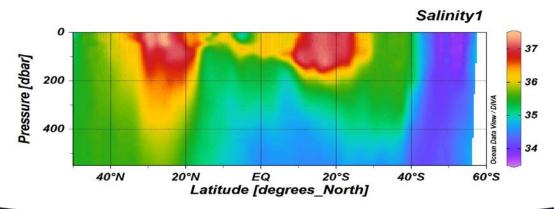

### **BODC** and AMT

Secure archive for receipt of data and metadata for the cruises

Data Management – On board data management (since 2011). Improve efficiency and accuracy of metadata collection.

Promote Good Practice and Develop Standards

Serve and provide access to data

### **BODC** onboard AMT

Science – Discrete fluorometry and salinity measurements. Processing CTD profiles.

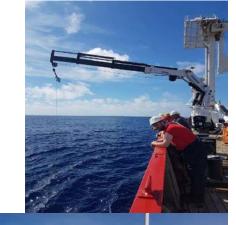

Managing and Curating Metadata

Advising on Standards

Learning

# Western Channel Observatory (WCO)

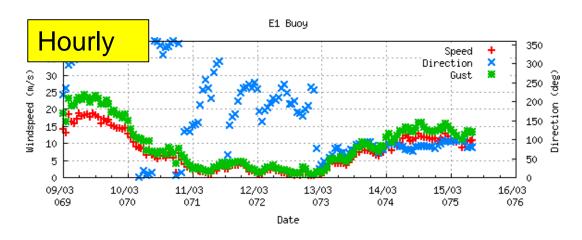

The Western Channel Observatory (WCO) is an oceanographic time-series and marine biodiversity reference site in the Western English Channel. *In situ* measurements are undertaken weekly at coastal station L4 and fortnightly at open shelf station E1 using the research vessels of the Plymouth Marine Laboratory and the Marine Biological Association.

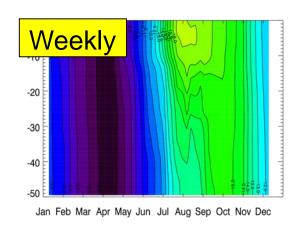

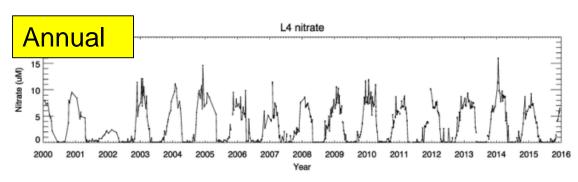

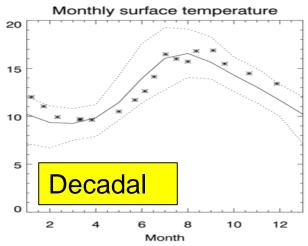

### WCO

### **BODC** and WCO

Secure archive for receipt of data and metadata for the cruises

Data Management – Annual submission and curation. WCO >30 years but some data >100 years.

Promote Good Practice and Develop Standards

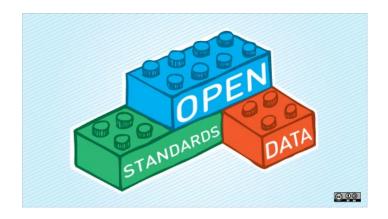

Serve and provide access to data

### **BODC** and WCO

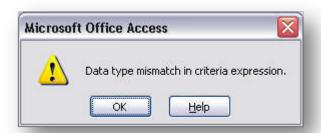

### **Open Data**

Meta(data) Standards

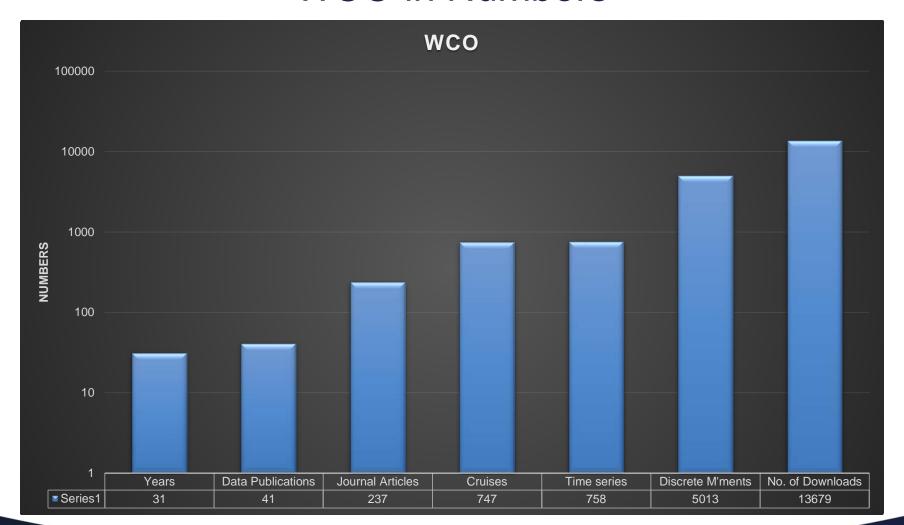

Legacy complexities
